Product presentation

(YK-0105 glass frosting powder)

Contents

- 01 Company profile(P3-6)
- 02 The introduction of YK-0105(P7-13)
- 03 Why choose Yuke?(P14-17)

Company profile **1**

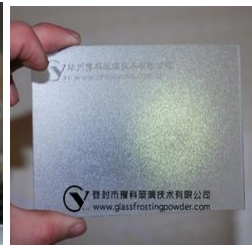

Company profile

Lamps

Crafts

Flat glass

Bottles

Glass frosting powder

TV screen

Automotive field

Computer Screen

It is used for the frosting processing of Wine bottles, cosmetic bottles

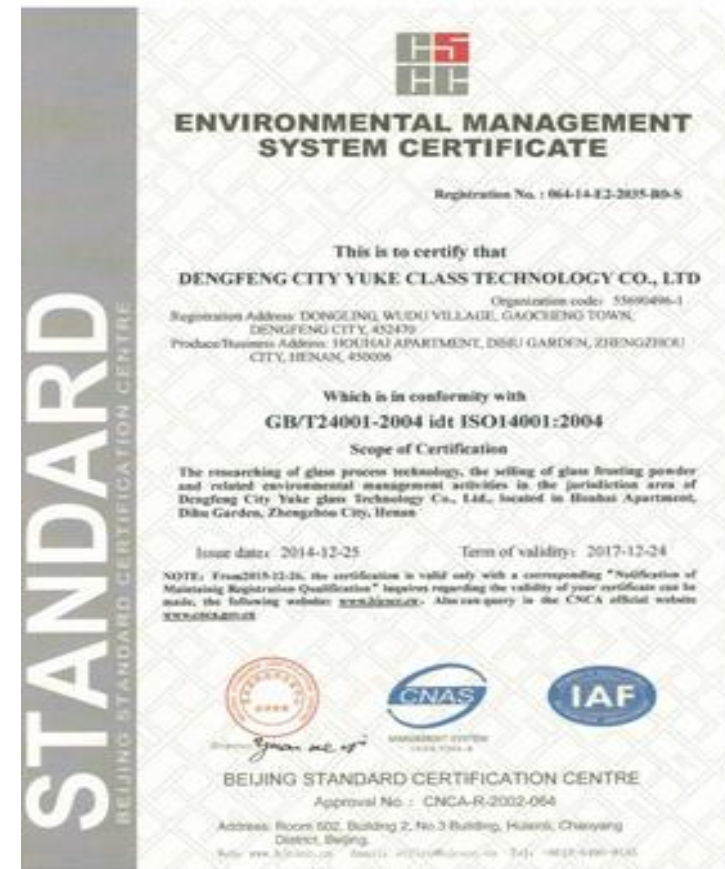

The finished products are mainly used as all of display screen

Company qualification

ISO9001:2008

ISO14001:2004

Company profile-Our partners

Glass frosting
powder

Automatic
Frosting
equipment

AG glass

CORNING

Annual capacity: About 6000TON

The introduction of YK-0105 etching powder **2**

- a. Basic information
- b. Production process

YK-0105 Satin-like effect glass etching powder

Frosted effect: The frosted surface feels smooth with small tinys spreading evenly,the dim white frosted surface is bright and lubricous as jade.

YK-0105 Satin-like effect glass etching powder

Applicability: The powder can be used to frost the flat glass, glassware, glass blocks and wine bottles, cosmetic glass and other glass products made with soda-lime material.

The video of the production process

YK-0105 Satin-like effect glass etching powder

The cost :

take 50ml、100ml、500ml common white wine bottle and Flat glass as example

$$\text{Cost} = \frac{\text{The price of per bag}}{\text{Output}}$$

Brand	eg Output	Bottles 50ml	Bottles 100ml	Bottles 500ml
Yuke		8000-15000	7000-12000	3000-6000
other		7500-12000	6000-10000	2500-4500

YK-0105 Satin-like effect glass etching powder

Product Stability

1. Good solubility, Dissolution time is short.
2. Good suspension, It not easy to precipitate.
3. Little affected by temperature, As long as the water does not freeze, ten degrees below zero is frosting processing can be performed.

YK-0105 Satin-like effect glass etching powder

Constrast	Good Powder	Common Powder
Solubility	High-purity,not easy to precipitate	Have impurities, easy to precipitate
Effect	Effect of stability between each batch	During production, the effect is sometimes good,sometimes bad
Cost	Easy to operate, save manpower and time, reduce the cost	Need to keep the debugging,Expend manpower and time,Increase the cost

Why choose Yuke

- a. Quality services
- b. Value-added Service

3

Why choose Yuke?

Share the latest marketing information with costumers
After-sales

Services

Pre-sales

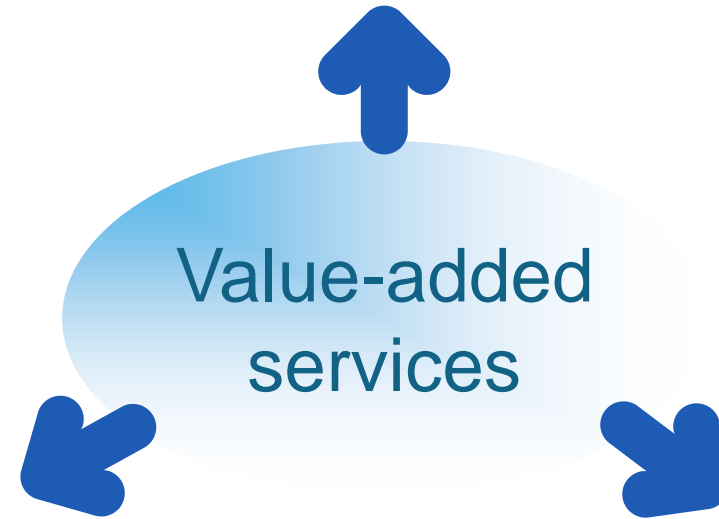

sale

The frosting equipment designed according to the customers' products size and daily output

provide the free technology instruction

Why choose Yuke?

we can help our customers seizing the market by the new frosted effect.

Technical exchanges will be hold once a year

we can provide the customized development service .

THE END

THANK YOU
